

Liquid Protein Supplement

Heal wounds fast with ReStoreell.

Wound healing requires a balanced diet for tissue regeneration, but standard diets may not always provide the necessary nutrients.

ReStoreell may help by providing essential nutrients such as protein, collagen, amino acids, vitamins and minerals that have been clinically shown to support wound healing.†

Fight wounds faster with up to 30x more collagen in an easy-to-take, no mixing required, liquid dose of only 30 mL! ReStoreell's unique formula packs 15 grams of powerful dual protein consisting of hydrolyzed collagen and whey for immediate absorption of 100% essential and non-essential amino acids.

ReStoreell is available as a basic recovery blend (Vitamend) or advanced rejuvenation blend (ProVitamend) in 32 oz bottles or 1 oz single-serve packets. Both have no sugar, soy or gluten and are suitable for those with lactose intolerance.

Vitamend™

- Maximum protein in minimum volume
- No mixing required
- No measuring: 1 capful or 1 packet = 1 dose
- Immediate absorption
- Ready-to-use by the body
- Economical cost savings
- No sugar, soy or gluten
- Suitable for those with lactose intolerance
- Low sodium, potassium and phosphorous
- Won't clog feeding tubes
- Available in Honey Vanilla or Peach Mango

ProVitamend™

- Same benefits of Vitamend PLUS MORE in a specialized formula
- Power of Dipeptides PO & OG makes up half of amino acid pool
- Creates collagen and stimulates fibroblasts (stem cells)
- L-Arginine, L-Citrulline, Hyaluronic Acid, Zinc, Copper, Vitamins
- Long-lasting: Remains in human plasma up to 4 hours
- Stimulates nitric oxide production; increases blood flow to site
- Aids in production of red blood cells & hemoglobin
- Helps tissue and muscle repair
- Stimulates protein and collagen synthesis
- Helps preserve lean body mass
- Decreases osmotic pressure; increases moisture to wound site
- Improves immune response, protects cells from free radicals
- Available in Watermelon flavor

★ ★ ★ ★ ★

ProVitamend Rejuvenation Blend is an advanced liquid protein supplement that combines the power of dipeptides plus micronutrients. It contains Dipeptide Proline - Hydroxyproline (PO) and Hydroxyproline - Glycine (OG) which, in clinical studies, are shown to be absorbed into the bloodstream and remain there for up to 4 hours. PO and OG reach the cellular levels of the skin, bones and joints, stimulating fibroblasts, thus enhancing the synthesis of collagen, hyaluronic acid and elastin, which repairs damaged skin tissue and promotes remodeling from within. Dipeptide PO and OG is patented and highly resistant to enzymatic degradation leading to faster wound healing.†
